

MIT Entrepreneurship Society

Goal

The goal of the MIT Entrepreneurship Society is two fold:

- 1) to establish an entrepreneurial support network among MIT students and recent alumni and actively promote productive interaction with MIT faculty, staff, other students, other alumni, and MIT-related new ventures, and;
- 2) to establish a stream of financial, intellectual, and material contributions to ensure MIT's continued excellence in entrepreneurship education and research.

To this end, and to serve as an inspiration to others, the undersigned agree to the following pledge:

Pledge

We the undersigned are committed to supporting entrepreneurship and excellence in education at MIT. Accordingly, we pledge ourselves to the goal of donating during our lifetime 5% of the capital appreciation of our ventures to the MIT program(s) of our choice.

Although our target donation level is 5%, we understand that historically donation levels for institutional giving by highly-committed entrepreneurs range from 3% to 25% over their lifetimes. As we would do with any donation, we retain the right to optimize the direction, time, tax effects, and amounts of our gifts. We look forward to sharing our successes with the Institute that helped us make them possible.
