Technology Transfer as a Team Effort:
Perspectives on and Insights into Technology Transfer

Wolf, Greenfield & Sacks, P.C.
Thursday, April 15, 2004

This event is designed to stimulate thought, discussion, and learning about the different objectives and constraints of the various participants in a technology transfer process. Our panel of experts will translate this learning into opportunities for successful technology transfer. The program will begin with an overview of the stages involved in technology transfer, moving from idea to commercialization and identifying key decisions involved in the process. This will set the stage for a panel discussion by experts with differing perspectives on the technology transfer process.
